

# PRONGHORN PR-6SW

PRICE: € **7995**  
WEIGHT: **8.7 KG** (PEDALS EXCLUDED)

Wikipedia says: "the gaffelbok (Dutch for pronghorn) is the fastest hoofed animal and one of the fastest mammals on earth. It easily reaches speeds of up to 70 km/h". Well, that speed should also be possible with this featherlight race fully. Pronghorn is a relatively unknown Danish manufacturer of pure 'bike porn'. This carbon frame weighs only 1720 grams

DT Swiss Carbon rear shock

(size 18") and makes you a solid € 2675 lighter as well. The position of the rear shock on the top tube means that there is a lot of forward thrust and the whole frame and rear triangle are

very stiff. It's like having a hardtail in the ascends and a fully in the technical sections. Fact is that already after a few hundred meters every test rider was highly impressed by the ridefeeling of the Pronghorn. In the NCB setup we got 8.7 kg of race ready riding fun. And what about all these numbers on the frame? Well, they are just the dimensions of the frame.
